Introduction

The *Milk and Milk Products* section covers all products derived from milk, including the following products for which examples are listed:

- ◆ Cultured milk products and their dry derivatives
- ◆ Dry milk products
- ◆ Fresh, chilled or frozen milk products that are pasteurized and require refrigeration
- ◆ Shelf-stable milk products that are heat processed to an extent that refrigeration is **not** necessary
- ◆ Shelf-stable food products that contain milk or milk products, usually prepackaged for individual use

◆ Miscellaneous products derived from milk that **do not** logically fit into one of the above divisions

Disregard all dates stamped on cans or labels of milk or milk products. These dates are **only** for quality control and have **no** application for determining admissibility.

Never apply 9CFR 94.11 to milk or milk products. This CFR restricts importations of meat and meat products from specified countries. The specified countries listed under 9CFR 94.11 are free from FMD; therefore, the live animal population is considered free from FMD.

Milk and milk products are **not** regulated according to the BSE status of a country.

Cultured Milk Products

- ◆ Acidophilus milk
- ◆ Cultured buttermilk
- ◆ Cultured cream
- ◆ Cultured milk-based soft drinks (such as CALPIS®)

- ◆ Dry ice cream mix

¹ Crème Fraîche is prohibited entry by the Food and Drug Administration (FDA). If this product is encountered, refer the importation to U.S. Customs for referral to an FDA inspector.

 - ❖ Casein
 - ❖ Caseinate
 - ❖ Galactose
 - ❖ Glucose (milk sugar)
 - ❖ Lactase
 - ❖ Lactalbumin

- ◆ Long-life milk
- ◆ Sterilized milk

Some processes that make the milk shelf stable are **not** necessarily sufficient to inactivate the FMD virus. Some processes use a combination of sugar and heat to help preserve the product, such as condensed and sweetened milk.

When milk or milk products are merely transiting the United States, follow the special procedures for **Animal Products or By-Products Transiting for Export** on page 2-4-35.

Milk or Milk Products Moving Under a VS Permit

When a VS permit authorizes entry of a milk product, match the following information on the shipping documents with that on the permit:

- ◆ Conditions spelled out on the permit
- ◆ Consignee
- ◆ Current date
- ◆ Description of the material
- ◆ Shipper

Follow **Table 3-14-1** as you match the permit with the shipping documents.
